forts, and save the souls of those who defend them.

The usual picket firing and artillery duelling between opposing forts disturbs from
time to time, the otherwise monotonous
work of holding our line on the front. But
new casmatties, however, happens—only two
so far as it learn, in front of the with A. C.,
during the past twelve or thritten days.

One afternoon three or four rabel bet
terks opened upon our tattery's, making, for
a time, the sir above us merry with exploding
shells, and, strange to an outsider, our menwers out of their bomb-proofs, enjoying the
pyrotechned display. And the writer, massed
though he was to this particular duty, yet, as
the occasion seemed to require, and fill view
of duty did not forbid, he stood for a time at
the lanyard of one of the guns and did all the
harm to the opposing battery which the acgurage of the gunner enabled him to accompileb. It was his first, and not tardily rendered service at such a post of lonor.

The Sanitary Commission,—such is the losthmony of all in the front,—is a God-send to
the soldiers. They bless the United States
Sanitary Commission and all its agents.
